State appropriations to the University and tuition and fees paid by students are the ultimate source of the bulk of the operating budget of the Department and are supplemented by grants and contracts from agencies such as the National Science Foundation. (E.g., a proposal prepared by Bill Abikoff and our computer systems manager, Kevin Marinelli, led to an award of \$50,000 (covering September 2001 through August 2002) from NSF to enhance the scientific research environment for the mathematical sciences through a strengthening of our computing facilities.) We are also grateful for the continuing support of the actuarial science program in the form of scholarships underwritten by corporate friends of the University. Contributions from current and former faculty members and their families have endowed the prizes and awards mentioned in the Awards Day article: for outstanding performance by undergraduates on the Department's Calculus Competition and the Mathematical Association of America's Putnam Mathematics Competition, and the Louis J. De Luca and Constance Strange awards for outstanding teaching and service by our graduate students.

We hope that the readers of Math CONNections will be inspired by such examples to participate as contributors on behalf of these or other departmental activities. If you wish to make a gift to the Department, please contact our chairman, Chuck Vinsonhaler, about the details. He can be reached by EMail at vinson@math.uconn.edu; by mail at Prof. Charles I. Vinsonhaler, Department of Mathematics, The University of Connecticut, Storrs CT 06269-3009; or by telephone at (860) 486-3944.
